

Little Blizzard XT & XT/SP

- 30% Higher Output Than LBSP
- Fluffier, Lighter, Drier Flakes
- More Conservative on Fluid
- Greater Range Variable Output
- DMX on board

Little Blizzard XT

Didn't think CIRC could make the most popular snow machine in the industry better? Thought we would just sit on our laurels? Think again! CIRC has outdone themselves by upgrading their most popular piece of equipment, the Little Blizzard. The Little Blizzard has a whole new look, inside and out.

The first thing you will notice is the great new deep blue powder coating. The surface is much smoother, yet still textured to be "show tuff." When you turn the machine on, you'll see the higher output almost immediately. The flakes never looked so light, so fluffy, and so dry. Third, you'll notice that you're getting about 20% more snow with the same amount of fluid. The variable speed now has a much greater range as well, going from wisps of snowflakes to larger, white fluffy, dry, flakes.

Available with or without soundproofing, CIRC's new Little Blizzard XT is definitely, "Cool Stuff That's Show Tuff!" ©

SPECIFICATIONS

XT SP 100252 120v, 100253 100v, 100254 230v

XT 100255 120v, 100257 230v

Dimensions: 20" x 10" x 12" (51 cm x 25 cm x 30 cm)

Weight: 30 lb (14 kg)

Shipping Weight: 35 lb (16 kg)

Shipping Box Size: 25" x 15" x 16" (64 cm x 38 cm x 41 cm)
